Professional Summary

Smart India Hackathon 2025 Finalist and MCA (Data Science & Analytics) student with strong analytical thinking and problem-solving skills. Experienced in SQL, Data Cleaning, Data Preprocessing, and Exploratory Data Analysis (EDA). Skilled in stakeholder communication, dashboard development, reporting automation, and generating actionable business insights using Python, Power BI, and relational databases.

Technical Skills

Programming: Python, SQL, JavaScript
Data Analysis: Data Cleaning, Data Preprocessing, EDA, Statistical Analysis, Correlation Analysis, KPI Reporting
Visualization & BI: Power BI, Excel (Pivot Tables, XLOOKUP), Dashboard Development, Business Intelligence
Libraries & ML: Pandas, NumPy, Matplotlib, Seaborn, Random Forest, XGBoost, Logistic Regression
Databases: PostgreSQL, MySQL, Relational Databases

Education

- **Teerthanker Mahaveer University** 2024 – 2026
  Master of Computer Applications (Data Science & Analytics) *CGPA: 9.6*

Projects

- **AI Data Analyst Web Application | Live | GitHub** 2026
  - Developed Django-based analytics platform enabling CSV upload, automated statistical summaries, visualization (histograms, heatmaps), and LLM-powered natural language business insights.
  - Performed correlation and distribution analysis using Pandas, NumPy, Matplotlib, and Seaborn to support data-driven decision making.
- **GitPro – GitHub Analytics Platform | Live | GitHub** 2026
  - Built full-stack analytics system extracting GitHub API data to compute repository metrics and visualize developer performance trends.
  - Designed interactive dashboards analyzing language distribution, repository impact, and contribution patterns.
- **CareerSphereAI 2.0 | Live | GitHub** 2026
  - Developed FastAPI and PostgreSQL-based career readiness and burnout prediction platform using classification models and structured data preprocessing.
- **AI Daily Knowledge Capsule | Live | GitHub** 2026
  - Built AI-powered micro-learning platform integrating OpenRouter LLM APIs with user engagement tracking analytics and responsive frontend design.

Experience

- **Python Intern** 2025
  Nainital Institute of Technology *Remote*
  - Automated data processing and reporting workflows using Python, improving efficiency and reducing manual effort.
- **Web Development Intern** 2025
  Anonic Technologies *Roorkee*
  - Developed backend-integrated web applications using PHP and relational database technologies.

Certifications

- IBM – Data Analysis with Python
- IBM – Deep Learning with TensorFlow
- Tata iQ – Data Analytics Simulation
- Python Programming – MSME Certified
- Outskill – Generative AI Mastermind Program
